Fortnite is one of the most popular games on the market, with over 350 million fans. Players are increasingly fighting against one another in order to win the game and obtain the best chests. However, in order to play this game successfully, some resources, such as V Bucks, are needed. Fortnite V Bucks are a virtual currency that can be purchased using real money. They are then used in the game's microtransaction shop to buy cosmetics, such as different skins and accessories, or to buy consumable items, like health and shield potions. These extra purchases help you play longer, but they don't give anyone an unfair advantage. Purchases are made with an account that's linked to a player's Epic Games account, and the V Bucks are stored in the player's Epic account until they're needed. You can purchase the currency on either PSN or Xbox Live, depending on your system of choice. Thankfully, there is another way to get V Bucks without spending a dime. You can use the free Fortnite V Bucks generator to generate free V-Bucks in no time. What are Fortnite Skins? Fortnite skins are cosmetic items that change the appearance of your character. Skins can be purchased with V-Bucks (the game's virtual currency), which can be earned by playing the game, bought with real money, or generated with our V-Bucks hack generator.
